

RGP1 FINCH

WORK POSITIONING/ADJUSTABLE RESTRAINT LANYARD

The RGP1 Finch can be used for work positioning by clipping onto both side D rings located on a work positioning belt and wrapping around a suitable structure, or as an adjustable restraint lanyard to prevent the user from entering the risk of a fall situation.

The smooth cam action allows the user to move freely and adjust with ease. When used in work positioning the RGP1 Finch has an additional wear sleeve to protect the rope from abrasion.

We advise using an RGL4 extension strop when attaching to your rear D plate.

Accredited to: EN 358:2018

Material: 11mm kernmantle nylon rope

Fittings: Double action snap hook, screwgate karabiner & adjuster (all aluminium alloy)

Sizes/weights: 2m - 620g
