RGH2 DELUXE

FRONT & REAR D SAFETY HARNESS

This two point safety harness offers improved comfort with the additions of a shoulder pad and leg pads.

The chest and leg straps comprise of fast fit buckles for quick donning. The two attachment points extend this harness's working capability. Meaning it can be used for fall protection and restraint situations in either vertical or horizontal planes. The ring connection between the chest and shoulder straps ensures no stress loading when force is applied to the front D ring. High contrast stitching makes inspection easier. The addition of a flexible rear D pad provides additional comfort. The inclusion of easy slide shoulder buckles increases the range of adjustment. The way the harness has been designed minimises the amount of rigid webbing edges. A variety of devices can be used with the harness, but check for suitability.

/ Front & rear attachment point

/ Fast fit buckles on chest and legs

/ Shoulder comfort pad

/ Leg comfort pads
